

**Cezary Zielinski** received: M.Sc./Eng. degree in control in 1982, Ph.D. degree in control and robotics in 1988 and D.Sc. (habilitation) degree also in control and robotics in 1996, all from Warsaw University of Technology (WUT), Faculty of Electronics and Information Technology (FEIT), Warsaw, Poland. In 2012 the title of professor was conferred upon him. He is a full professor of WUT employed by the Institute of Control and Computation Engineering (ICCE). He also worked for Nanyang Technological University, Singapore (1999-2001). He served as the vice-dean for Research and International Cooperation of FEIT WUT (2002-2005), deputy director for Research at the ICCE (2005-2008), and the director of this institute (2008-2016). Currently he is the vice-dean for General Affairs of FEIT. Since 2007 he is a member and was the secretary of the Committee for Automatic Control and Robotics of the Polish Academy of Sciences. Moreover in the years 2003-2007 and since 2015 he has been a member of the Forecast Committee of the Polish Academy of Sciences: *Poland 2000 Plus*. In WUT he heads the Robotics Group in ICCE working on the design of robot controllers and programming methods. His research interests focus on robotics in general and especially include: robot programming methods, robot control architectures, specification of robotic system software, multi-robot system controllers, robot kinematics, robot position-force control, visual servo control, utilisation of sensors in robot control, design of digital circuits. He is the author/coauthor of over 200 conference and journal papers as well as books concerned with the above mentioned research subjects.
